

Attitude and Expression

Knowledge of attitude and expression is the difference between a competent rendering and a drawing that is alive and full of character. The best animal drawings all reveal some sort of attitude or character in them. This is not easily mastered, but when your drawings have attitude they convey interest and feeling. When you are drawing an attitude, detail is unimportant, and can be added later if so desired. Exaggeration is useful in capturing bodily attitude and mood. Attitude should start from the line of action or gesture. In just a few lines you should be able to see what your subject's attitude is.
