six cycles which are placed in their historical context and are analyzed in relation to cultural discourses such as technological embodiment race animal human relations environmentalism global capitalism and the techno scientific Empire By considering these cycles which include superhero films creature films space operas among others as expressions of the genre's basic oppositions the book facilitates the comparison and juxtaposition of films that have rarely been discussed in tandem offering a new perspective on the multiple articulations of the SF film in the new millennium

From Film Adaptation to Post-Celluloid Adaptation Costas Constandinides, 2010-10-21 The main corpus of film adaptation thus far has focused on films based on canonical literature From Film Adaptation to Post Celluloid Adaptation takes the next logical step by discussing the emerging modes of film adaptation from older media to new mainly focusing on the computer generated reconstructions of popular narratives and characters along with other forms of convergence such as the Internet While New Media is a broad concept the book will concentrate on the ways digital technology is being used in the encoding of films and discuss the ways this shift can be debated from a theoretical perspective Though the discussion is framed through the new media lens the work will not exclude a broader understanding of New Media which refers to video games official websites and interactivity so as to examine how the visual style of contemporary films is dispersed across and influenced by other media Discussing films like Minority Report King Kong 300 and Wanted in relation to Film Adaptation theory the work aims to challenge and rework the definition of adaptation
