The Jurisdiction of the International Criminal Court Victor Tsilonis, 2024-02-24 This book embarks on a comprehensive exploration of the jurisdiction of the International Criminal Court ICC and elucidates the three foundational aspects of its jurisdiction as laid out in the Rome Statute the preconditions for exercising jurisdiction Article 12 ICCRSt its substantive competence regarding core crimes Articles 5 8bis ICCRSt and the principle of complementarity Article 17 1 a ICCRSt This principle crucial to understanding the ICC s ultimate jurisdiction is invoked only when a State Party demonstrates an inability or unwillingness to genuinely undertake investigation or prosecution The book further probes the negative preconditions of the Court s jurisdiction in particular immunities Article 27 ICCRSt and exceptions through Security Council referrals Articles 13 b and 15 ICCRSt Intended for students scholars and practitioners alike this second edition offers invaluable insights into the ICC s jurisdiction making a notable contribution to the existing literature Importantly it also navigates emerging fields of international criminal law addressing topical and thought provoking subjects such as ecocide cyber warfare automated lethal weapons artificial intelligence and the legal complexities arising from the Russian invasion of Ukraine Winner of the Second International Science Prize 2024 of the Hans G nter Brauch Foundation for Peace and Ecology in the Anthropocene HGBS on the Theme Ecocide Impacts of Wars and or Climate Change on Food Security Since 1945

Law, Ecology, and the Management of Complex Systems Tiina Paloniitty, 2022-08-19 This book addresses the role of law in the adaptive management of socio ecological systems Recent years have witnessed a rise in discussion over the relation between adaptivity and law as if after decades of insouciance legal scholars have finally started to understand the impacts of the scientific paradigm called adaptive management on the legal sphere Even though the complicated relations between law and the adaptive management of socio ecological systems have become more debated a thorough examination of the scientific and theoretical fundamentals of such endeavours has yet to be presented Using the illustrative example of European Union water governance and its path toward embracing adaptive management this book emphasises the legal significance of properly understanding the manner in which scientific knowledge of the environment is produced Though always pivotal rigorously apprehending science is especially crucial when dealing with the management of complex ecosystems as the normative is created gradually before law begins to examine the facts of the matter After examining the roots of adaptive management this book argues that the legal needs to understand itself as an integral part of the process of the socio ecological management of complex systems and not merely an external umpire resolving disputes As a whole the book offers new insights into the EU regulator s approaches to scientific realities making it an interesting read not only to academics and legal scholars but also to regulators striving to deepen their understanding or pondering which approach to adopt in the face of new regulatory challenges and to scientists interested in the science and law aspects of their work

Fragmentation and the European Patent System Karen Walsh, 2022-08-11 This book provides an in depth study on current perceptions of and responses to fragmentation in the European patent system EPS For decades attempts have been made to address this fragmentation by introducing a unitary patent system The most recent attempt the EU unitary patent system will be the first of its kind It is expected to significantly change the EPS However rather than reducing existing fragmentation it will likely add to it Based on an analysis of the current and forthcoming system the book argues that the inherent nature of fragmentation within the EPS needs to be recognised and suggests that a multifaceted approach is required to respond to it Uniquely it draws on work regarding fragmentation outside of the patent and intellectual property regimes gaining insights from both European law making and the international legal system These insights are used to investigate current responses to fragmentation in the EPS Interpretations of substantive patent law are examined including claim construction *Actavis v Eli Lilly* exceptions to patentability related to uses of human embryos for industrial or commercial purposes *WARF* *Br stle* *ISCC* and products resulting from essentially biological processes *Broccoli* and *Tomatoes II* *G3 19* Attempts towards convergence in these areas have had mixed results and in some instances fragmentation may be necessary However similar techniques to those applied in the international legal system to respond to fragmentation are being used in the EPS and where this is seen it has been to good effect It is argued that these methods should be recognised structured and promoted to make our response to fragmentation more effective **Fragmentation and the European Patent System** will be of interest to academics students and practitioners looking for a new perspective on the EPS
