Memorandum Of Agricultural Science June 2014:

OECD Food and Agricultural Reviews Agricultural Policies in the Philippines OECD,2017-04-07 This report analyses Philippine agricultural policy Agriculture provides 30% of total employment in the Philippines and represents 11% of its Gross Domestic Product The Philippines has had notable recent overall economic success yet improving agricultural performance remains challenging

Achieving Food Security in China Zhang-Yue Zhou,2017-05-18 China's food security has never failed to attract the public's attention Feeding China's large population has always been a huge challenge The latest large scale famine took place in 1958-62 during which approximately 37 million people died of starvation However since the early 1980s China's food availability has improved drastically The important question is then has China achieved its food security Although China's food availability has significantly improved it has not achieved a high level of food security due to the lack of progress in several other important dimensions of food security The book examines China's food security practices in the past six decades explores the root causes that led to food shortages or abundances and elaborates on the challenges that China has to deal with in order to improve its future food security China's quest for food security serves as a valuable lesson for many other countries to learn through China's experiences and to better manage their food security in the future The book also draws attention to the fact that China's food security status has a huge impact on the global community and hence global collaboration is a mutually beneficial approach
