Fever of War Carol R Byerly, 2005-04-05 The influenza epidemic of 1918 killed more people in one year than the Great War killed in four sickening at least one quarter of the world's population In *Fever of War* Carol R Byerly uncovers the startling impact of the 1918 influenza epidemic on the American army its medical officers and their profession a story which has long been silenced Through medical officers memoirs and diaries official reports scientific articles and other original sources Byerly tells a grave tale about the limits of modern medicine and warfare The tragedy begins with overly confident medical officers who armed with new knowledge and technologies of modern medicine had an inflated sense of their ability to control disease The conditions of trench warfare on the Western Front soon outflanked medical knowledge by creating an environment where the influenza virus could mutate to a lethal strain This new flu virus soon left medical officers confidence in tatters as thousands of soldiers and trainees died under their care They also were unable to convince the War Department to reduce the crowding of troops aboard ships and in barracks which were providing ideal environments for the epidemic to thrive After the war and given their helplessness to control influenza many medical officers and military leaders began to downplay the epidemic as a significant event for the U S army in effect erasing this dramatic story from the American historical memory

Race and Education in New Orleans Walter Stern, 2018-05-04 Surveying the two centuries that preceded Jim Crow's demise *Race and Education in New Orleans* traces the course of the city's education system from the colonial period to the start of school desegregation in 1960 This timely historical analysis reveals that public schools in New Orleans both suffered from and maintained the racial stratification that characterized urban areas for much of the twentieth century Walter C Stern begins his account with the mid eighteenth century kidnapping and enslavement of Marie Justine Sirnir who eventually secured her freedom and played a major role in the development of free black education in the Crescent City As Sirnir's story

and legacy illustrate schools such as the one she envisioned were central to the black antebellum understanding of race citizenship and urban development Black communities fought tirelessly to gain better access to education which gave rise to new strategies by white civilians and officials who worked to maintain and strengthen the racial status quo even as they conceded to demands from the black community for expanded educational opportunities The friction between black and white New Orleanians continued throughout the nineteenth century and well into the twentieth when conflicts over land and resources sharply intensified Stern argues that the post Reconstruction reorganization of the city into distinct black and white enclaves marked a new phase in the evolution of racial disparity segregated schools gave rise to segregated communities which in turn created structural inequality in housing that impeded desegregation's capacity to promote racial justice By taking a long view of the interplay between education race and urban change Stern underscores the fluidity of race as a social construct and the extent to which the Jim Crow system evolved through a dynamic though often improvisational process A vital and accessible history *Race and Education in New Orleans* provides a comprehensive look at the ways the New Orleans school system shaped the city's racial and urban landscapes
