## **Manual White Balance Gimp:**

*GIMP 2.8 for Photographers* Klaus Goelker, 2013-05-15 Image editing is a crucial element in the photographic workflow. Image editing tools most notably Photoshop are usually sophisticated and deep applications and are fairly expensive. The only open source tool in this market is the GIMP which has developed into a powerful multiplatform system running on Linux, Mac OS X and Microsoft Windows. *GIMP 2.8 for Photographers* is a beginner's guide to the only open source image editing tool that provides a no cost alternative to expensive programs such as Photoshop. Topics include the new user interface and tools, the basics of image editing and simple adjustments, advanced techniques using layers and masks, developing RAW images, working with the improved text tool and preparing high quality black and white images. The most important editing functions are presented in individual easy to follow workshops. A bonus section on the included DVD describes special techniques for web graphics. *GIMP 2.8 for Photographers* has evolved from classroom materials that the author developed and taught in courses and workshops on image editing with the GIMP.

**MATLAB® and Design Recipes for Earth Sciences** Martin Trauth, Elisabeth Sillmann, 2012-09-14 The overall aim of the book is to introduce students to the typical course followed by a data analysis project in earth sciences. A project usually involves searching relevant literature, reviewing and ranking published books and journal articles, extracting relevant information from the literature in the form of text data or graphs, searching and processing the relevant original data using MATLAB and compiling and presenting the results as posters, abstracts and oral presentations using graphics design software. The text of this book includes numerous examples on the use of internet resources on the visualization of data with MATLAB and on preparing scientific presentations. As with its sister book *MATLAB Recipes for Earth Sciences* 3rd Edition 2010 which demonstrates the use of statistical and numerical methods on earth science data, this book uses state of the art software packages including MATLAB and the Adobe Creative Suite to process and present geoscientific information collected during the course of an earth science project. The book's supplementary electronic material available online through the publisher's website includes color versions of all figures, recipes with all the MATLAB commands featured in the book, the example data, exported MATLAB graphics and screenshots of the most important steps involved in processing the graphics.

*Beginning Photo Retouching and Restoration Using GIMP* Phillip Whitt, 2014-12-20 *Beginning Photo Retouching Restoration Using GIMP* teaches the reader how to achieve professional results using this high end image editor. You'll learn how to do everything from making dull images pop to resurrecting badly damaged photographs deemed beyond any hope of rescue. There's no need to shell out good money month after month for the big name software package. *GIMP 2.8* is a world class image editor that wields almost as much power and is completely free. Learning the art of photo retouching and restoration is fun and rewarding. Reclaim those treasured images from the ravages of time and neglect and pass them on to future generations. *Beginning Photo Retouching Restoration Using GIMP* will provide you with a wide array of editing exercises to help you develop a high degree of proficiency.
