Connected for Health Louise L. Liang, 2010-05-17 Kaiser Permanente has implemented the largest nongovernmental electronic health record in the world serving more than 8.6 million Kaiser Permanente members. Called KP HealthConnect, its impact on patient care outcomes, efficiency, safety, and patient engagement and satisfaction already is of intense interest throughout the health care industry. In this volume, Louise L. Liang, MD, who led the massive KP HealthConnect implementation, collects lessons learned from the organization's successful deployment strategy and highlights ways in which the new technological tools are changing and improving the health care provided to patients and the operations and culture of the organization. Advance praise for *Connected for Health*: Health care transformation requires leadership and innovation. *Connected for Health* clearly shows there is no shortage of either at Kaiser Permanente. This is a must read for policy makers and practitioners as the lessons are of critical value if we are to achieve quality, affordable care for Americans. H. Stephen Lieber, president and CEO, Healthcare Information and Management Systems Society. *Connected for Health* shares what Kaiser Permanente has learned so far in tapping the vast potential of electronic health records to improve care and expand the frontiers of medical research. It is a journey that should be of great interest to policy leaders in the United States and around the world. Karen Davis, president, The Commonwealth Fund. This book is destined to become an important part of the critical dialogue on what reforming our health care system really means. James J. Mongan, MD, Professor of Health Care Policy and Social Medicine, Harvard Medical School. *Connected for Health* shows how KP HealthConnect is facilitating great team-based care, getting quality right every time, getting patients activated, and freeing caregivers to connect as true healers with their patients. Margaret E. O'Kane, president, National Committee for Quality Assurance. Effective implementation and use of health information technology is critical to improving the quality, safety, and affordability of health care. This book provides a great opportunity for others to learn from Kaiser Permanente's pioneering efforts. Janet M. Corrigan, president and CEO, National Quality Forum. **National Library of Medicine Audiovisuals Catalog** National Library of Medicine (U.S.),

Best Care at Lower Cost Institute of Medicine, Committee on the Learning Health Care System in America, 2013-06-10 America's health care system has become too complex and costly to continue business as usual. *Best Care at Lower Cost* explains that inefficiencies, an overwhelming amount of data, and other economic and quality barriers hinder progress in improving health and threaten the nation's economic stability and global competitiveness. According to this report, the knowledge and tools exist to put the health system on the right course to achieve continuous improvement and better quality care at a lower cost. The costs of the system's current inefficiency underscore the urgent need for a systemwide transformation. About 30 percent of health spending in 2009, roughly 750 billion, was wasted on unnecessary services, excessive administrative costs, fraud, and other problems. Moreover, inefficiencies cause needless suffering. By one estimate, roughly 75,000 deaths might have been averted in 2005 if every state had delivered care at the quality level of the best.

performing state This report states that the way health care providers currently train practice and learn new information cannot keep pace with the flood of research discoveries and technological advances About 75 million Americans have more than one chronic condition requiring coordination among multiple specialists and therapies which can increase the potential for miscommunication misdiagnosis potentially conflicting interventions and dangerous drug interactions Best Care at Lower Cost emphasizes that a better use of data is a critical element of a continuously improving health system such as mobile technologies and electronic health records that offer significant potential to capture and share health data better In order for this to occur the National Coordinator for Health Information Technology IT developers and standard setting organizations should ensure that these systems are robust and interoperable Clinicians and care organizations should fully adopt these technologies and patients should be encouraged to use tools such as personal health information portals to actively engage in their care This book is a call to action that will guide health care providers administrators caregivers policy makers health professionals federal state and local government agencies private and public health organizations and educational institutions
