It takes cultural and transcultural and positive psychology perspectives into consideration and explores the topic of women's empowerment from diverse stances across social strata, cultural divides as well as economic and political divisions. It addresses the critique of the overly Western focus of positive psychology on this topic by adopting a transnational and transcultural lens and by taking non-WEIRD Western Educated Industrialized Rich Democratic samples into in-depth consideration. The chapters therefore focus on women from diverse socio-cultural, political, socio-economic backgrounds and discuss their ways of empowering others and being empowered. They also discuss related positive psychology constructs such as coping, resilience, transformation, growth, leadership, creativity, identity, development, sustainable action as well as positive socio-economic, political, and eco-sustainable thought and action. The volume as a whole looks at women's leadership as a factor of empowerment. A further fundamental assumption is that women's empowerment is needed to create a sustainable future at micro, meso, and macro levels which presumes safety, peace, ecological considerations, and compassionate leadership. *Sustainable Development in Africa* Walter Leal Filho, Rudi Pretorius, Luiza Olim de Sousa, 2021-07-09 This book serves the purpose of documenting and promoting African experiences on sustainable development which encompasses both formal and non-formal education. Sustainable development is very important to Africa but there is a paucity of publication which documents and promotes experiences from African countries. Due to their complexity, the interrelations between social, economic, and political factors related to sustainable development especially at universities need to be better understood. There is also a real need to showcase successful examples of how African institutions are handling their sustainability challenges. It is against this background that this book has been produced. It is a truly interdisciplinary publication useful to scholars, social movements, practitioners, and members of governmental agencies and private companies undertaking research and/or executing projects focusing on sustainability from across Africa. As African nations strive to pursue the UN Sustainable Development Goals, it is imperative to cater for the information needs seen across the continent and foster the dissemination of experiences and case studies which may support both on-going and future efforts. The scope of the book is deliberately kept wide and we are looking for contributions across the spectrum of sustainable development from business and economics to arts and fashion, administration, environment, languages, and media studies.
