Ocean Wave Energy Technology Alireza Shadmani, Mohammad Reza Nikoo, Amir H. Gandomi, 2025-08-25 This book demonstrates the transformative power of optimization algorithms in advancing ocean wave energy. It blends theory with practice to explain how computational optimization can dramatically enhance the efficiency and performance of wave energy converters devices that harness the power of ocean waves for renewable energy. The book's illustrations and detailed tables provide visual and comparative insights into the interactions between various algorithmic approaches and wave energy systems, helping make complex engineering concepts accessible to non specialists. With real world case studies and innovative perspectives on algorithmic optimization in wave farm design, this book serves as a comprehensive gateway to understanding not only the fundamentals of wave energy but also the cutting edge techniques steering the field toward a more sustainable future.

Photovoltaic Science and Technology J. N. Roy, D. N. Bose, 2018-03-09 Discusses the principles of operation of photovoltaic devices, their limitations, choice of materials, and maximum efficiencies.

Specifications of Photovoltaic Pumping Systems in Agriculture Imene Yahyaoui, 2016-11-05 Specifications of Photovoltaic Pumping Systems in Agriculture: Sizing, Fuzzy Energy Management, and Economic Sensitivity Analysis is the first book of its kind to discuss the physical installation and sizing of PV pumping systems, also providing a successful energy management operation and economic sensitivity analysis. In order to balance production with consumption and to improve the lifetime of batteries, Imene Yahyaoui offers a complete study through sensitive analysis of system components and sizing algorithms, providing guidance for efficient energy conversion and management for off-grid systems. From this single source, readers will be equipped with all the necessary data they need to understand, plan, and implement cost-reduced systems. Contains practical examples on how to optimize photovoltaic energy to pump water. Presents case studies on both the physical installation and effective energy management of PV water pump systems. Provides in-depth economic studies that justify optimization reliability.
