Gross Domestic Problem Doctor Lorenzo Fioramonti,2013-01-17 Gross domestic product is arguably the best known statistic in the contemporary world and certainly amongst the most powerful It drives government policy and sets priorities in a variety of vital social fields from schooling to healthcare Yet for perhaps the first time since it was invented in the 1930s this popular icon of economic growth has come to be regarded by a wide range of people as a problem After all does our quality of life really improve when our economy grows 2 or 3 per cent Can we continue to sacrifice the environment to safeguard a vision of the world based on the illusion of infinite economic growth Lorenzo Fioramonti takes apart the content of GDP what it measures what it doesn t and why and reveals the powerful political interests that have allowed it to dominate today s economies In doing so he demonstrates just how little relevance GDP has to moral principles such as equity social justice and redistribution and shows that an alternative is possible as evinced by the de growth movement and initiatives such as transition towns A startling insight into the politics of a number that has come to dominate our everyday lives

Green Budget Reform in Europe Kai Schlegelmilch,2012-12-06 Budgets have a big influence on the economy and society With many countries about 50 percent of total expenditures and income pass through the budget via taxes charges and expenditures In recent years many countries e g in the OECD and the EU have tended to use this influence in an environmentally rational way Traditional environmental policy has relied on command and control and end of pipe technologies that have proven to be insufficient in coping with the challenge of global change Hence many countries have

started to investigate the environmental impacts of their budgets by looking at existing taxes and charges as well as tax allowances and exemptions and other relevant regulations and expenditures even to have a special impact on the environment The implementation of those not meant such findings is now broadly discussed in these countries This publication will contribute to the debate It is a result of a wider project called Green Budget Reform Prospects in Central and Eastern Europe initiated by Vida Ogorelec Wagner managing Director of Umanotera The Slovenian Foundation for Sustainable Development and then jointly developed proposed to the EC and carried out in partnership with Kai Schlegelmich of the Wuppertal Institute in Germany The project comprised an international seminar on Green Budget Reform in April 1997 at Lake Bled Slovenia and the Case Study of Sloveilla *Journal of Agricultural and Applied Economics* ,2004 **Illinois Documents List** ,1995 Public Budgeting Systems Robert D.
