

(12) Oil Seal and Grease Seal

Replace any oil or grease seals that were removed with new ones, as removal generally damages seals.

When pressing in a seal which has manufacturer's marks, press it in with the marks facing out. Seals should be pressed into place using a suitable driver, which contacts evenly with the side of seal, until the face of the seal is even with the end of the hole.

(13) Seal Guide

A seal guide is required for certain oil or grease seals during installation to avoid damage to the seal lips. Before a shaft passes through a seal, apply a little high temperature grease on the lips to reduce rubber to metal friction.

(14) Circlips, Retaining Ring

Replace any circlips and retaining rings that were removed with new ones, as removal weakens and deforms them. When installing circlips and retaining rings, take care to compress or expand them only enough to install them and no more.

(15) Lubrication

Engine wear is generally at its maximum while the engine is warming up and before all the rubbing surfaces have an adequate lubricative film. During assembly, oil or grease (whichever is more suitable) should be applied to any rubbing surface which has lost its lubricative film. Old grease and dirty oil should be cleaned off. Deteriorated grease has lost its lubricative quality and may contain abrasive foreign particles.

Don't use just any oil or grease. Some oils and greases in particular should be used only in certain applications and may be harmful if used in an application for which they are not intended. This manual makes reference to molybdenum disulfide grease (MoS_2) in the assembly of certain engine and chassis parts. Always check manufacturer recommendations before using such special lubricants.

(16) Electrical Wires

All the electrical wires are either single-color or two-color and, with only a few exceptions, must be connected to wires of the same color. On any of the two-color wires there is a greater amount of one color and a lesser amount of a second color, so a two-color wire is identified by first the primary color and then the secondary color. For example, a yellow wire with thin red stripes is referred to as a "yellow/red" wire; it would be a "red/yellow" wire if the colors were reversed to make red the main color.

Wire (Cross-section)	Name of Wire Color
 <div style="display: flex; flex-direction: column; align-items: flex-end; margin-left: 10px;"> <div>Red</div> <div>Wire strands</div> <div>Yellow</div> <div>Red</div> </div>	Yellow/red

(17) Replacement Parts

When there is a replacement instruction, replace these parts with new ones every time they are removed. These replacement parts will be damaged or lose their original function once removed.

(18) Inspection

When parts have been disassembled, visually inspect these parts for the following conditions or other damage. If there is any doubt as to the condition of them, replace them with new ones.

Abrasion	Crack	Hardening	Warp
Bent	Dent	Scratch	Wear
Color change	Deterioration	Seizure	

(19) Specifications

Specification terms are defined as follows.

"Standards" show dimensions or performances which brand-new parts or systems have.

"Service limits" indicate the usable limits. If the measurement shows excessive wear or deteriorated performance, replace the damaged parts.

Kawasali Manual Bayou 3

Alan Ahlstrand, John Harold Haynes

Kawasali Manual Bayou 3:

American Book Publishing Record ,2004 *Pipeline Planning and Construction Field Manual* E. Shashi Menon,1978-06-26 Pipeline Planning and Construction Field Manual aims to guide engineers and technicians in the processes of planning designing and construction of a pipeline system as well as to provide the necessary tools for cost estimations specifications and field maintenance The text includes understandable pipeline schematics tables and DIY checklists This source is a collaborative work of a team of experts with over 180 years of combined experience throughout the United States and other countries in pipeline planning and construction Comprised of 21 chapters the book walks readers through the steps of pipeline construction and management The comprehensive guide that this source provides enables engineers and technicians to manage routine auditing of technical work output relative to technical input and established expectations and standards and to assess and estimate the work including design integrity and product requirements from its research to completion Design piping civil mechanical petroleum chemical project production and project reservoir engineers including novices and students will find this book invaluable for their engineering practices Back of the envelope calculations Checklists for maintenance operations Checklists for environmental compliance Simulations modeling tools and equipment design Guide for pump and pumping station placement **Kawasaki Bayou 220/300 & Prairie 300 ATV** Alan Ahlstrand,John Harold Haynes,2002-03 *Yamaha PW50 Y-Zinger, PW80 Y-Zinger and BW80 Big Wheel 81-02* ,2000-05-24 PW50 1981 1983 1985 1987 1990 2002 PW80 1983 1985 1991 2002 BW80 1986 1988 1990 Field & Stream ,1989-04 FIELD STREAM America s largest outdoor sports magazine celebrates the outdoor experience with great stories compelling photography and sound advice while honoring the traditions hunters and fishermen have passed down for generations
