

The Making of the Fittest: Natural Selection and Adaptation

LESSON STUDENT HANDOUT

PROCEDURE

1. Watch the short film *The Making of the Fittest: Natural Selection and Adaptation*.
2. Using the DNA nucleotide sequence in the gene tables (page 3), determine the complementary messenger RNA (mRNA) sequence for the portion of the *Mclr* gene provided. (Note: You are only transcribing a small portion of the DNA sequence for this protein. The actual gene contains 951 base pairs.) The numbers above some of the columns indicate amino acid positions in the protein sequence. Also indicated is whether the sequence codes for an extracellular, intracellular, or transmembrane part of the protein.
3. Using the mRNA sequence determined in Step 2, determine the resulting amino acid sequence of the MC1R protein. (Note: This is only a portion of the 317 amino acids in the entire protein. The numbers above some of the columns in the tables indicate amino acid positions in the protein sequence.) You may use the genetic code chart provided in your textbook or the one on page 7 of this handout.
4. There are five mutations in the dark-color *Mclr* mutant gene. Compare the DNA sequence of the wild-type *Mclr* gene with the DNA sequence of the mutant *Mclr* gene. Indicate the locations of the five mutations by circling the five single DNA nucleotides that are mutated in the mutant *Mclr* gene table.
5. From the introduction, determine whether each of these mutations is a silent, missense, or nonsense mutation.
 - a. Using the mutant *Mclr* gene data, shade in the columns (including DNA, mRNA, and amino acid) in the mutant table that contain a **silent mutation**. Use a **blue colored pencil** to do this.
 - b. Likewise, use a **red colored pencil** to shade in the columns that contain a **missense mutation**.
 - c. Shade any columns that **contain nonsense mutations** by using a **green colored pencil**.
6. Answer the questions following the gene tables.

Making Of The Fittest Natural Selection Answers

Clarence H. Seyler

Making Of The Fittest Natural Selection Answers:

Unplugging the Classroom Hilary Anne Wilder, Sharmila Pixy Ferris, 2017-05-17 Unplugging the Classroom Teaching with Technologies to Promote Students Lifelong Learning provides techniques to help teaching and learning in an age where technology untethers instruction from the classroom from semester seat time and from a single source of expertise The book brings together researchers and practitioners from diverse academic fields including library perspectives and presents interdisciplinary discussions from both theoretical and applied areas It is unique in its goal of bringing educators and librarians together to explore the challenges that are faced by students and faculty in any time any place any path and any pace learning In spite of the fact that the mobile revolution has definitively arrived students and faculty alike aren't ready to make the leap to mobile learning The pressures of technological advances along with the changing nature of learning will demand increasingly profound changes in education Researchers have begun to address this issue but the revolution in mobile communication has not been accompanied by a concomitant growth in pedagogical resources for educators and students More importantly such growth needs to be undergirded by sound learning theories and examples of best practice Provides a hands on resource useful to both novices and experts for technology enabled teaching and learning Gives both discipline specific and cross disciplinary perspectives Discusses discipline specific mobile applications Offers an opportunity to meet the needs of contemporary learners and foster their competencies as lifelong learners Addresses emerging issues in technology and pedagogy

Baby Dinosaurs on the Ark? Janet Kellogg Ray, 2021-09-09 A scientific look at creationism from a former creationist A significant number of Americans especially evangelical Christians believe Earth and humankind were created in their present form sometime in the last 10 000 years or so the rationale being that this is presumably the story told in the book of Genesis Within that group any threatening scientific evidence that suggests otherwise is rejected or when possible retrofitted into a creationist worldview But can this uncomfortable blend of biblical literalism and pseudoscience hold up under scrutiny Is it tenable to believe that the Grand Canyon was formed not millions of years ago by gradual erosion but merely thousands of years ago by the Great Flood Were there really baby dinosaurs with Noah on his ark Janet Kellogg Ray a science educator who grew up a creationist doesn't want other Christians to have to do the exhausting mental gymnastics she did earlier in her life Working through the findings of a range of fields including geology paleontology and biology she shows how a literal interpretation of the book of Genesis simply doesn't mesh with what we know to be reality But as someone who remains a committed Christian Ray also shows how an acceptance of the theory of evolution is not necessarily an acceptance of atheism and how God can still be responsible for having created the world even if it wasn't in a single momentary miraculous event

Darwin - God's Ambassador George Di Palma, 2009-12-01 This book will reveal some insight of the inner Charles Darwin the tormented mind who sought God but failed to find him who formed a theory but failed to authenticate it Darwin's final years ended as a man in limbo troubled by his accursed book as he called it He did not

realise at the time what the future had in store for the strange ideology which he so reluctantly thrust upon the world

Part of the Problem, Part of the Solution Arvind Sharma, 2008-09-30 Part of the Problem Part of the Solution unleashes religion's true potential to do good by bridging the modern divide between religion and an ever pervasive secular society a notion often loathed by individuals on both sides of the religious aisle As noted scholars such as Huston Smith Karen Armstrong Rosemary Radford Ruether Harvey Cox and Seyyed Hossein Nasr explain throughout the conversations related in this text people of varied and conflicting faiths can come together to engage in civil useful dialogue and members of quite varied religious traditions can work together for the benefit of all humankind and can help defuse the world's current epidemic of violence By showing how religion is an instrument in human affairs that can be tuned for both good and evil this book lays the groundwork for an important cooperative effort to blossom Furthermore today's trend of associating all religion with suspicion has spiraled into a dangerous situation that in discarding all religion because some of it causes harm one risks throwing away the baby with the bathwater Books such as *When Religion Becomes Evil* by Charles Kimball *The God Delusion* by Richard Dawkins *The End of Faith* by Sam Harris *Breaking the Spell Religion as a Natural Phenomenon* by Daniel Dennett and *God is Not Great How Religion Poisons Everything* by Christopher Hitchens have created quite a sensation leaving the impression that religion at its root brings more heartache than handshakes This development has dismayed many scholars students and practitioners of religion of all faiths who believe that only half the story the negative half is being told Although demonstrating that certain religious beliefs have surely contributed to the violence that has occurred in this century this book also explores how other religious teachings can help solve the epidemic of violence
