different social economical or cultural backgrounds as well as different working methods They have opposing interests and suffer from a lack of information about what others need and want Therefore the division of labor requires a coordinating element a manager or a leader It is their task to coordinate all the individuals creating a unified direction of work By this all efforts can be focused on a common goal Commonly the terms management and leadership are used synonymous with reference to the coordination function in business or administration This raises the question whether there is a difference between the two terms management and leadership and if so how this difference can be described and defined Sometimes one can hear the saying that managers do the things right but leaders do the right things This adage states a significant difference between leadership and management However there is a heated debate about this topic The opinions differ widely about this topic This paper will discuss the terms management and leadership in a theoretical and practical way These two terms will be defined as well as differentiated from each other A special focus will be laid on the management functions and managerial roles and activities This will be discussed from a theoretical point of view In addition a practical example will clarify the theoretical angle      Concept of leadership and management within the manufacturing industry Andreas
