*Division of Meteorological Physics Technical Paper*, 1954      *Soviet Physics*, 1977      *Atomic Physics of Highly Charged Ions* Erhard Salzborn, Paul H. Mokler, Alfred Müller, 2012-12-06 This book contains the invited lectures and contributed papers presented at the V International Conference on the Physics of Highly Charged Ions which was held at the Justus Liebig University at Gießen 10-14 September 1990. This conference was the fifth in a series after Stockholm 1982, Oxford 1984, Groningen 1986 and Grenoble 1988 to deal with a rapidly growing field which comprises the spectroscopy of highly charged ions and their interactions with photons, electrons, atoms, ions and solids. Most of the matter of the universe is in the ionized state. Investigations dealing with hot plasmas on earth have been greatly furthered by thermonuclear fusion research. The increasing maturity of this programme has revealed the fundamental role of highly charged ions in fusion plasmas. Today it is clear that a detailed knowledge of the production mechanisms of highly charged ions and their interactions with other plasma constituents is an important prerequisite for a better understanding of the microscopic and macroscopic plasma properties. The study of highly charged ions involves various branches of physics. It was the aim of the conference to bring together physicists working in atomic collisions and spectroscopy in plasma physics and astrophysics as well as in solid state and ion source physics. About 220 scientists from 20 nations attended the conference indicating the strong worldwide interest and the vitality of research in this field.      Physics Express, 1958 Abstracts and condensations from various Soviet journals
