Snow-What?

Snow is a type of precipitation that falls from the ground down clouds. It is formed when water vapor in the air condenses into tiny droplets. These droplets then freeze into ice crystals. The droplets are so small that they can stay in the air for a long time before falling to the ground as snow.

Snowfall is most common in the winter months. It is also common in some mountainous areas. Snow is a beautiful sight and can be fun to play in. However, it can also be dangerous if it falls too fast or if it is accompanied by strong winds.
