UNIT: FRICTION

Friction: force resisting the relative motion of solid surfaces and material elements sliding against each other.

There is two types of frictions:

1. Static friction: friction between two or more solid objects that are not moving relative to each other.

$$F_{us} = \mu_s \times R$$

2. Kinetic friction: force occurring when two or more objects are moving relative to each other and rubs together.

$$F_{uk} = \mu_k \times R$$

Normal force: upward force perpendicular to the surface it rests on. Is always equal to the weight of the objects in the opposite direction.
