and CPU utilisation can be used as criteria to compare and evaluate big data technologies to improve organisational performance. Most of the articles contribution reemphasised technology education and training as a means of digitising business and improving effectiveness. Target audience: The target readership is academic researchers and business leaders who require access to the latest developments in the fields of economics, information management, business education, development studies, social sciences and technology. It is also for policymakers and other stakeholders who need a better understanding of the impact of new developments on existing policies and regulations for their review or amendment.

The Political Economy of Xenophobia in Africa Adeoye O. Akinola, 2017-11-13. This book analyzes the phenomenon of xenophobia across African countries. With its roots in colonialism which coercively created modern states through border delineation and the artificial merging and dividing of communities, xenophobia continues to be a barrier to post colonial sustainable peace and security and socio economic and political development in Africa. This volume critically assesses how xenophobia has impacted the three elements of political economy: state, economy and society. Beginning with historical and theoretical analysis to put xenophobia in context, the book moves on to country specific case studies discussing the nature of xenophobia in Nigeria, South Africa, Zambia, Ghana and Zimbabwe. The chapters furthermore explore both violent and non violent manifestations of xenophobia and analyze how state responses to xenophobia affects African states economies and societies especially in those cases where xenophobia has widespread institutional support. Providing a theoretical understanding of xenophobia and proffering sustainable solutions to the proliferation of xenophobia in the continent, this book is of use to researchers and students interested in political science, African politics, peace studies, security and development, economics as well as policy makers working to eradicate xenophobia in Africa. *Namibia Review*,
