Node.js, MongoDB and AngularJS Web Development Brad Dayley, 2014. Annotation: Node.js, MongoDB, and AngularJS Web Development. The definitive guide to building JavaScript based Web applications from server to browser. Node.js, MongoDB, and AngularJS are three new web development technologies that together provide an easy to implement, fully integrated web development stack. Node.js is a leading server side programming environment. MongoDB is the most popular NoSQL database, and AngularJS is quickly becoming the leading framework for MVC based front end development. Together, they allow web programmers to create high performance sites and applications built completely in JavaScript, from server to client. Node.js, MongoDB, and AngularJS Web Development is a complete guide for web programmers who want to integrate these three technologies into full working solutions. It begins with concise, crystal clear tutorials on each of the three technologies, and then quickly moves on to building several common web applications. Readers will learn how to use Node.js and MongoDB to build more scalable, high performance sites; how to leverage AngularJS's innovative MVC approach to
