Measuring Up Eoc Biology:

Meeting the Challenges to Measurement in an Era of Accountability Henry Braun, 2016-01-29 Under pressure and support from the federal government states have increasingly turned to indicators based on student test scores to evaluate teachers and schools as well as students themselves The focus thus far has been on test scores in those subject areas where there is a sequence of consecutive tests such as in mathematics or English language arts with a focus on grades 4-8 Teachers in these subject areas however constitute less than thirty percent of the teacher workforce in a district Comparatively little has been written about the measurement of achievement in the other grades and subjects This volume seeks to remedy this imbalance by focusing on the assessment of student achievement in a broad range of grade levels and subject areas with particular attention to their use in the evaluation of teachers and schools in all It addresses traditional end of course tests as well as alternative measures such as portfolios exhibitions and student learning objectives In each case issues related to design and development psychometric considerations and validity challenges are covered from both a generic and a content specific perspective The NCME Applications of Educational Measurement and Assessment series includes edited volumes designed to inform research based applications of educational measurement and assessment Edited by leading experts these books are comprehensive and practical resources on the latest developments in the field The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license

Biology builds on Wiley's unparalleled reputation for helping students and researchers understand the crucial role of chemistry and chemical techniques in the life sciences **Journal of Experimental Biology**, 2006 **Cancer Research**, 2005-10 *Contemporary Obstetrics and Gynecology for Developing Countries* Friday Okonofua, Joseph A. Balogun, Kunle Odunsi, Victor N. Chilaka, 2021-08-05 This book is a comprehensive and easy to read guide to obstetrics and gynecology in developing countries. Although significant progress has been made towards the reduction of maternal mortality and morbidity globally, they are still unacceptably high in developing countries. This can be directly or indirectly tied to poor quality maternal health care and lack of access to cost-effective comprehensive healthcare. Health practitioners in developing countries also contend with trying to keep abreast of recent developments in obstetrics and gynecology while dealing with lack of time resources and access to relevant information. This textbook was thus created by experts in obstetrics and gynecology with extensive experience in African clinical settings and consultants in developed countries to teach proper and accurate diagnosis, treatment, and management of gynecologic and obstetric health issues within the context of developing countries. This second edition has been fully updated throughout with an added 25 chapters that cover topics such as reproductive health, gynecological cancers, and research methods. The book is divided into six sections: Women's Reproductive Health, Obstetrics, Medical and Surgical Disorders in Pregnancy, General Gynecology, Gynecological Malignancies, Health Systems Organization, Research Methodology, and Biostatistics. These section topics have been carefully covered by expert authors with the use of valid scientific data, policy instruments, and adapted to the cultural and social context of developing countries with particular in-depth coverage of conditions that have greater prevalence and incidence in developing countries. Each chapter also focuses on filling gaps in knowledge with a distinct pedagogical approach starting with a set of learning objectives and ending with key takeaways for the chapter. This is an ideal guide for residents, medical students, practitioners of obstetrics and gynecology, midwives, general practitioners, and pediatricians, particularly those working in developing countries.
