The Ultimate DIY Guide to Building Motorcycles Simon Phil M D,2022-02-24 Motorcycles have been around for a long time but the first motorcycle was not built until the 19th century. The first commercial motorcycle was built by Edward Butler in Great Britain in 1884. It employed a horizontal single cylinder engine mounted between two steerable front wheels and a drive shaft connected to the rear wheel. By 1900 many manufacturers were producing pedal cycles as well as adding a motor centrally mounted between the engines. The first road motorcycle took part in competition between manufacturers. The first Tourist Trophy motorcycle races were held in the Isle of Man in 1907 as well as endurance races. Since then the proving ground for many new designs has been the Isle of Man. Supercharged multi-cylinder engines mounted on aerodynamic frames have been developed. In this simple DIY guide you will learn the basics of constructing a motorcycle and how to reconstruct one the way you want. You will also find out what you need to ensure your bike is perfect the way you want it. After reading this book you will see how easy it is to build a motorcycle from the scratch. So enjoy and read on.
