Kenyatta University Bridging:

Public & Private Universities in Kenya Kilemi Mwiria, Partnership for Higher Education in Africa, 2007 Reviews the history of higher education in Kenya and details the emergence of private universities most of them with a Christian religious orientation as major players in the provision of tertiary level education *Kenyatta University Tribune*, 2003 *Bridging the Gap?* Helen Sarah Lund, 1998 This study examined the extent to which e mail and Internet access is available within universities in developing countries in the British Commonwealth Data were gathered using a survey of 300 institutions in developing Commonwealth countries and responses by 112 institutions in 19 countries were evaluated The study concluded that a major gulf exists between developed and developing countries in communications technologies and that a significant injection of funds will be needed if this is to be bridged Overall the study found Internet access has been achieved at some level in about a quarter of accredited university level institutions while e mail access has reached about 45 percent of institutions Generally Internet access is more widespread in Asia the Caribbean and the Asian Pacific region than in Africa The majority of higher education institutions surveyed had achieved connectivity only within the last three years More than 50 percent of respondents relied on analogue dial up access via a modem and almost half the institutions relied on common terminals in some cases only one to provide Internet and e mail for the whole university community Appendices include the questionnaire used a list of World Wide Web addresses and a list of e mail addresses Contains 23 references DB

Vocational Education and Training Through Open and Distance Learning Louise Moran, Greville Rumble, 2004-08-02 Conventional apprenticeships and older methods of professional training are not providing enough skilled workers governments companies and colleges are now using open and distance learning to fill these gaps Published in association with the Commonwealth of Learning this unique review provides detailed analysis of worldwide experiences of vocational training and distance education It looks at recent policy and practice at different levels from transnational programmes and national policies to institutional and programme models Offering guidance on how distance education and new technologies are being used to support vocational education and training this book will help senior institutional managers and policy makers to understand and appreciate the role distance education can play in increasing skills levels in young people and the existing workforce the challenges in using educational technologies and distance education to deliver vocational education and training how to devise effective policies to meet these challenges *Positioning Diversity in Kenyan Schools* Malve von, 2022-06-01 Education is considered key for societies to achieve greater social cohesion and equality Yet schools as the main providers of formal education have increasingly come into question concerning their role in manifesting and perpetuating social categorisations inequalities and discrimination instead of decreasing existing fragmentations and challenging power relations and hierarchies As a diverse society Kenya is faced with power struggles and rivalries between different groups for instance along ethnic lines often constructed deep in colonial history This affects teaching and learning

in school and the result is that Kenya is faced with vast disparities in terms of educational access and success rendering some social groups marginalised and others favoured Positioning Diversity at Kenyan Schools explores the ways in which teachers in Kenyan primary and secondary schools experience and deal with social categorisations and diversity in terms of ethnicity gender wealth culture religion etc in their professional practice and in the current education system Using critical pedagogy and diversity theory as a lens for positioning diversity in Kenyan schools the questions that this book sets out to answer are In what ways do the teachers and schools practices lead to transformation in terms of more social equality and less discrimination In what ways do the practices manifest existing group categorisations hierarchies and discrimination How can schools and teaching practices in postcolonial Kenya become more inclusive and foster social cohesion and equality
