and Steel Structures provides a practical guide to the design of reinforced concrete and steel structures and foundations in industrial projects. Renowned expert Mohamed A El Reedy covers the entire industrial construction process from project management to design and construction to sign off and providing a maintenance plan. Highlighting the differences between industrial construction and real estate or residential construction, he examines every phase and every role from managerial to technical. He includes cases from industrial projects and covers the international technical practices, codes and standards used in steel or concrete onshore or offshore projects. The book provides up to date methodologies in structure analysis, geotechnical studies and international special codes and standards for industrial structures such as tanks, foundation under towers, machines and special structures in industrial projects. It also examines the safety and economic benefits of developing a structure integrity management system. When a project has a budget that seems as huge as the structure itself, the client, engineering firm and contractor must work together to achieve success. Discussing the interface between these three main partners, this book outlines strategies for checking the design and controlling a project in all its phases.

Hydrocarbon Processing, 1978-04 *ACI Manual of Concrete Practice* American Concrete Institute, 2002 *Companion Guide to the ASME Boiler & Pressure Vessel Code* K. R. Rao, 2006.
