## **Makerere Admissions Private 2015:**

**Research Universities in Africa** Nico Cloete, Ian Bunting, 2018-11-09 From the early 2000s a new discourse emerged in Africa and the international donor community that higher education was important for development in Africa Within this zeitgeist of converging interests a range of agencies agreed that a different collaborative approach to linking higher education to development was necessary This led to the establishment of the Higher Education Research and Advocacy Network in Africa Herana to concentrate on research and advocacy about the possible role and contribution of universities to development in Africa This book is the final publication to emerge from the Herana project The project has also published more than 100 articles chapters reports manuals and datasets and many presentations have been delivered to share insights gained from the work done by Herana Given its prolific dissemination it seems reasonable to ask whether this fourth and final publication will offer the reader anything new This book is certainly different from previous publications in several respects First it is the only book to include an analysis of eight African universities based on the full 15 years of empirical data collected by the project Second previous books and reports were published mid project This book has benefited from an extended gestation period allowing the authors and contributors to reflect on the project without the distractions associated with managing and participating in a large scale project For the first time some of those who have been involved in Herana since its inception have had the opportunity to at least make an attempt to see part of the wood for the trees Different does not necessarily mean new An emphasis on the newness of the data and perspectives presented in this book is important because it shows that it is more than a historical record of a donor funded project Rather each chapter in this book brings to a lesser or greater extent something new to our understanding of universities research and development in Africa

**Transforming Research Excellence** McLean, Robert , Tijssen, Robert, Wallace, Matthew L., Kraemer-Mbula, Erika, 2020-01-18 Modern day science is under great pressure A potent mix of

increasing expectations limited resources tensions between competition and cooperation and the need for evidence based funding is creating major change in how science is conducted and perceived Amidst this perfect storm is the allure of research excellence a concept that drives decisions made by universities and funders and defines scientists research strategies and career trajectories But what is excellent science And how to recognise it After decades of inquiry and debate there is still no satisfactory answer Are we asking the wrong question Is reality more complex and excellence in science more elusive than many are willing to admit And how should excellence be defined in different parts of the world particularly in lower income countries of the Global South where science is expected to contribute to pressing development issues despite often scarce resources Many wonder whether the Global South is importing with or without consenting the flawed tools for research evaluation from North America and Europe that are not fit for purpose This book takes a critical view of these issues touching on conceptual issues and practical problems that inevitably emerge when excellence is at the center of science systems Emerging from the capacity building work of the Science Granting Councils Initiative in sub Saharan Africa it speaks to scholars as well as to managers and funders of research around the world Confronting sticky problems and uncomfortable truths the chapters contain insights and recommendations that point towards new solutions both for the Global South and the Global North

**American Higher Education in a Global Context** Cristina González, 2022-02-14 American Higher Education in a Global Context Historical Perspectives describes the current state of universities on each continent providing a comprehensive analysis of the numerous factors that have affected higher education systems around the world This book studies higher education from its emergence in antiquity to the establishment of the American research university model and its adoption around the globe through the current Covid 19 pandemic and concomitant economic and political crisis The author pays special attention to the shortcomings of the neoliberal trend of the last four decades which increased social stratification at institutions of higher learning Calling for an expansion of access to tertiary education and in particular to research universities this book examines the competition between China and the United States in the field of higher education stressing the importance of academic freedom without which there can be no true academic excellence

**Student Politics in Africa** Luescher, Thierry M., Klemencic, Manja, 2016-05-12 The second volume of the African Higher Education Dynamics Series brings together the research of an international network of higher education scholars with interest in higher education and student politics in Africa Most authors are early career academics who teach and conduct research in universities across the continent and who came together for a research project and related workshops and a symposium on student representation in African higher education governance The book includes theoretical chapters on student organising student activism and representation chapters on historical and current developments in student politics in Anglophone and Francophone Africa and in depth case studies on student representation and activism in a cross section of universities and countries The book provides a unique resource for academics university leaders and student affairs
