Street Smart Samuel I Schwartz, 2015-08-18 On a Saturday morning in December 1973 a section of New York's West Side Highway collapsed under the weight of a truck full of asphalt The road was closed seemingly for good and the 80 000 cars that traveled it each day had to find a new way to their destinations It ought to have produced traffic chaos but it didn't The cars simply vanished It was a moment of revelation the highway had induced the demand for car travel It was a classic case of build it and they will come but for the first time the opposite had been shown to be true knock it down and they will go away Samuel I Schwartz was inspired by the lesson He started to reimagine cities most of all his beloved New York freed from their obligation to cars Eventually he found he was not alone Since the turn of the twenty first century a surreptitious revolution has taken place every year Americans are driving fewer miles And the generation named for this new century the Millennials are driving least of all Not because they can't afford to they don't want to They have better ideas for how to use their streets An urban transformation is underway and smart streets are at the heart of it They will boost property prices and personal fitness roll back years of congestion and smog and offer a transformative experience of American urban life From San Francisco to Salt Lake Charleston to Houston the American city is becoming a better and better place to be Schwartz's Street Smart is a dazzling and affectionate history of the struggle for control of American cities and an inspiring off road map to a more vibrant active and vigorous urban future
