Life Science Memorandum Paper November 2014:

Access to Scientific Research David J. Brown, 2015-11-13 The debate about access to scientific research raises questions about the current effectiveness of scholarly communication processes This book explores from an independent point of view the current state of the STM publishing market new publishing technologies and business models as well as the information habit of researchers the politics of research funders and the demand for scientific research as a public good The book also investigates the democratisation of science including how the information needs of knowledge workers outside academia can be embraced in future

Supreme emergency Andrew Corbett, 2022-02-15 In *Supreme emergency* an ex Trident submarine captain considers the evolution of UK nuclear deterrence policy and the implications of a previously unacknowledged aversion to military strategies that threaten civilian casualties Drawing on extensive archival research the book provides a unique synthesis of the factors affecting British nuclear policy decision making and draws parallels between government debates about reprisals for First World War zeppelin raids on London the strategic bombing raids of the Second World War and the evolution of the UK nuclear deterrent It concludes that among all the technical factors an aversion to being seen to condone civilian casualties has inhibited government engagement with the public on deterrence strategy since 1915

Streaming and Copyright Law Lasantha Ariyaratna, 2022-09-05 This book examines the challenges posed to Australian copyright law by streaming from the end user perspective It compares the Australian position with the European Union and United States to draw lessons from them regarding how they have dealt with streaming and copyright By critically examining the technological functionality of streaming and the failure of copyright enforcement against the masses it argues for strengthening end user rights The rising popularity of streaming has resulted in a revolutionary change to how digital content such as sound recordings cinematographic films and radio and television broadcasts is used on the internet Superseding the conventional method of downloading using streaming to access digital content has challenged copyright law because it is not clear whether end user acts of streaming constitute copyright infringement These prevailing grey areas between copyright and streaming often make end users feel doubtful about accessing digital content through streaming It is uncertain whether exercising the right of reproduction is appropriately suited for streaming given the ambiguities of embodiment and scope of substantial part Conversely the fair dealing defence in Australia cannot be used aptly to defend end users acts of streaming digital content because end users who use streaming to access digital content can rarely rely on the defence of fair dealing for the purposes of criticism or review news reporting parody or satire or research or study When considering a temporary copy exception end users are at risk of being held liable for infringement when using streaming to access a website that contains infringing digital content even if they lack any knowledge about the content's infringing nature Moreover the grey areas in circumventing geo blocking have made end users hesitant to access websites through streaming because it is not clear whether technological protection measures apply to geo blocking End users have a severe

lack of knowledge about whether they can use circumvention methods such as virtual private networks to access streaming websites without being held liable for copyright infringement Despite the intricacies between copyright and access to digital content the recently implemented website blocking laws have emboldened copyright owners while suppressing end users access to digital content This is because the principles of proportionality and public interest have been given less attention when determining website blocking injunctions

European Welfare State Constitutions after the Financial Crisis

Ulrich Becker, Anastasia Poulou, 2020-11-25 Hit by the European financial and economic crisis in 2008 several Member States of the European Monetary Union EMU were unable to refinance their public debt through the financial markets As a result they asked for financial assistance from international institutions and European financial assistance mechanisms That assistance often came at a high price for citizens cuts in pensions and social assistance and controversial reforms in public healthcare These far reaching reforms were in many cases experienced as violations of people s human rights National constitutional courts the Court of Justice of the EU and the European Court of Human Rights issued a series of rulings on the conformity of the reforms in social protection initiated during the Eurozone crisis This book offers a holistic analysis of the specific reforms in social protection introduced during the European financial crisis and their implications for constitutional law Focusing on the social reforms of nine European countries that were greatly affected by the financial crisis the volume seeks to address the legacy of the financial crisis on the application of constitutional law and the welfare state The book will act as a helpful tool to legal academics interested in the challenges of constitutional and social law initiated by financial assistance conditionality to advocates in quest of sound legal bases for the protection of individuals affected by social security reforms and to national and international judges who are confronted with cases that question the legality and legitimacy of the crisis related reforms
