

MBA Capstone Project Description

Throughout your MBA program, you have worked to develop as a business professional and prepare to meet future challenges as a business leader. Your program culminates in the capstone project, which forms the primary focus of MBA-FPX5910, the final course you will take in the program. The capstone project is intended to provide you the opportunity to demonstrate your MBA program outcomes by:

- Planning and executing the strategic and tactical elements of a comprehensive project.
- Integrating and demonstrating the business leadership skills and techniques you have learned throughout the MBA program.
- Communicating your analysis and recommendations for a real organization both in written form and in a formal presentation.
- Completing your MBA program with an experience that reinforces and integrates what you have learned throughout your MBA program.

The following information outlines the requirements and work associated with the capstone project for MBA-FPX5910.

Capstone Project Examples

You have a wide variety of choice when it comes to choosing a capstone project that is personally interesting and rewarding to you. It is your responsibility to propose a capstone topic and scope that will allow you to demonstrate all of the MBA program outcomes.

Examples of project types that might be proposed to meet these requirements include, but are not limited to:

- A *strategic plan* developed for an organization to use that helps them solve a problem or take advantage of an opportunity.
- A *strategic analysis* conducted on a selected part or area of an organization.
- A *case study* developed on a selected part of or situation within an organization.
- An *intervention* developed to address an organizational issue; for example, a workshop or training activity. The intervention should be broad-based enough to demonstrate the program-level outcomes.
- A *consulting report* developed to analyze a problematic issue within an organization; the issue and analysis should be broad-based enough to demonstrate program-level outcomes.

You may propose other project types for the capstone project so long as you are able to identify how the proposed project satisfies the requirement of demonstrating the program-level outcomes. When choosing your project type and/or topic, keep in mind that it must result in recommendations, next steps, or some other type of actionable, evidence-based takeaways for your intended audience, user, or subject of the project.

community and can access the latest local news and information about events in their local area They can form and join groups in which activities can be planned managed and promoted to the public One of the most important features of iZoca is the integrated personal calendar However the company is struggling with difficulties Membership is growing very slowly Only about 4000 people are currently signed up at iZoca com Revenues generated by ads on the website are scarce For these reasons we propose a strategy shift iZoca should enter the market of Learning Management Systems LMS by partnering with an existing LMS With its key features the group and community structure and the shared calendar it has the potential to satisfy needs of students and colleges that are currently either not or only insufficiently addressed by existing players in the market such as Blackboard or Moodle s Joule The entire college could be mirrored virtually in a community on iZoca Classes could be organized in groups over which students and teachers can interact and communicate about all issues related to the class Teachers could upload the syllabus or assignments students could hand in assignments by uploading Through the integrated calendar group members would always have an up to date overview of the class schedule or due dates for assignments Other things like campus events could also be organized in groups directly on the LMS platform Through a smartphone application students could also access the latest information about classes and campus events directly over their smartphones These examples show that iZoca could clearly offer benefits to college students However before any actions are undertaken into this direction it is important to put any assumptions about customer needs on a fact based fundament To accomplish this a survey has been conducted with college students about their perceptions of their college s current LMS and about their appraisal of the features iZoca could offer The results of this survey are presented in this research paper
