Multistorey Architecture Manual:

Manual of Multistorey Timber Construction Hermann Kaufmann, Stefan Krötsch, Stefan Winter, 2018-01-19 Wood is suitable for use in multistorey building construction with barely any restrictions This is new and requires creative rethinking of tried and tested practices in wood construction classical categories can be replaced by mixed construction methods as necessary within a project which yields completely new possibilities in designing wood structures The Manual provides architects engineers and wood specialists with the essential expertise on the new systematics and construction methodology from the design to prefabrication to the implementation on site It lays the grounds for mutual understanding among everyone involved in the project to facilitate the necessary cooperation in the integral planning and construction process

Architecture and Construction in Steel Alan Blanc, Michael McEvoy, Roger Plank, 2003-09-02 This book provides a comprehensive guide to the successful use of steel in building and will form a unique source of inspiration and reference for all those concerned with architecture in steel

Use of Timber in Tall Multi-Storey Buildings Ian Smith, Andrea Frangi, 2014-01-01 Since the dawn of civilization timber has been a primary material for achieving great structural engineering feats Yet during the late 19th century and most of the 20th century it lost currency as a preferred material for construction of large and tall multi storey building superstructures This Structural Engineering Document SED addresses a reawakening of interest in timber and timber based products as primary construction materials for relatively tall multi storey buildings Emphasis throughout is on holistically addressing various aspects of performance of complete systems reflecting that major gaps in knowhow relate to design concepts rather than technical information about timber as a material Special consideration is given to structural form fire vulnerability and durability aspects for attaining desired building performance over lifespans that can be centuries long
