**Computer Recognition Systems** Marek Kurzynski, Edward Puchala, Michal Wozniak, Andrzej Zolnierrek, 2007-12-13 th  
This book contains papers accepted for presentation at the 4 International Conference on Computer Recognition Systems  
CORES 05 May 22 25 2005 Rydzyna Castle Poland This conference is a continuation of a series of conferences on similar  
topics KOSYR organized each second year since 1999 by the Chair of Systems and Computer Networks Wroclaw University  
of Technology An increasing interest to those conferences paid not only by home but also by foreign participants inspired the  
organizers to transform them into conferences of international range Our expectations that the community of specialists in  
computer recognizing systems will find CORES 05 a proper form of maintaining the tradition of the former conferences have  
been confirmed by a large number of submitted papers Alas organizational constraints caused a necessity to narrow the  
acceptance criteria so that only 100 papers have been finally included into the conference program The area covered by  
accepted papers is still very large and it shows how vivacious is scientific activity in the domain of computer recognition  
methods and systems It contains various theoretical approaches to the recognition problem based on mathematical statistics  
fuzzy sets morphological methods wavelets syntactic methods genetic algorithms artificial neural networks ontological  
models etc Most attention is still paid to visual objects recognition however acoustic textual and other objects are also  
considered Among application areas medical problems are in majority recognition of faces speech signals and textual in
