

SYSTEM 8: Audiophile Single-Subwoofer System

This is a perfect setup for the customer who wants the highest levels of sound quality but is not interested in huge bass.

The single 12W/3 in the CS112-W3 provides strong output and excellent bass quality without taking up a ton of trunk space. It's driven by a 250/1 monoblock.

The four XR systems (XR650-CS in the front, XR650-CX in the rear) are cleanly driven by the 300/2.

This system is shown connected to a single pair of line level outputs at the head unit. In this configuration, front-to-rear fading is not possible and subwoofer level must be carefully preset.

Recommended initial amplifier settings for this system...

Notes: These settings are intended as a "baseline" for tuning this system. Depending on the vehicle and the customer's taste, some variation in the crossover and bass control settings may be necessary for optimum performance.
