these two case studies is to understand the successes challenges and opportunities faced by each country in fostering a conducive innovation ecosystem for scaling up DATs The case study analysis focuses on six dimensions of the innovation ecosystem in Kenya and Nigeria finance regulatory environment culture density human capital and infrastructure The third part of the study is based on the interactions and learnings from a pilot event to boost the innovation ecosystem in Kenya The Disruptive Agricultural Technology Innovation Knowledge and Challenge Conference in Nairobi Kenya brought together more than 300 key stakeholders from large technology companies agribusiness companies and public agencies government representatives and experts from research and academic institutions and representatives from financial institutions foundations donors and venture capitalists Scaling Up Disruptive Agricultural Technologies in Africa concludes by establishing that DATs are demonstrating early indications of a positive impact in addressing food system constraints It offers potential entry points and policy recommendations to facilitate the broader adoption of DATs and improve the overall food system

The Pentecostal World Michael Wilkinson,Jörg Haustein,2023-04-01 The Pentecostal World provides a comprehensive and critical introduction to one of the most vibrant and diverse expressions of contemporary Christianity Unlike many books on Pentecostalism this collection of essays from all continents does not attempt to synthesize and simplify the movement s inherent diversity and fragmented dispersion Instead the global flows of Pentecostalism are firmly grounded in local histories and expressions as well as the various modes of their worldwide reproduction The book thus argues for a new understanding of Pentecostal and Charismatic movements that accounts for the simultaneous processes of pluralization and homogenization in contemporary World Christianity Written by a distinguished team of international contributors across various disciplines the volume is comprised of six parts with each offering a critical perspective on classical themes in the study of Pentecostalism Led by a programmatic introduction the thirty six chapters within these parts explore a variety of themes history and historiography conversion spirit beliefs and exorcism prosperity politics gender relations sexual identities racism development migration pilgrimage interreligious relations media ecumenism and academic research The Pentecostal World is essential reading for students and researchers in anthropology history political science religious studies sociology and theology The book will also be very useful for those in related fields such as culture studies black studies ethnic studies and gender studies

Humanizing Circular Supply Chain Management K. Mathiyazhagan,Vernika Agarwal,Snigdha Malhotra,Veronica Scuotto,2025-10-25 This book the improvements in the circular economy are discussed and a multidisciplinary approach is taken to examine developments in the recovery of value in CSCM This book s main goal is to give readers a platform on which to discuss the role of human resources in effective supply chain management in a circular economy and how it may be used CSCM is a new way of conducting business that offers a waste free and sustainable substitute to the economy The concept of CSCM is often incomplete if the human capital aspect of it is not covered Human resources or human capital represents a person s skills talents qualifications and experiences Thus it is inconceivable that

the shift to a circular economy would be successful without a new strategy for managing human resources The COVID 19 epidemic has heightened and realigned the value of human capital inside organizations whether it is through remote work policies greater attention to employee health benefits staff morale or well being concerns It has provided HR professionals with the ability to reevaluate their interactions with employees and has made room for innovative working methods To end the loop of the linear economic model sustainability and sustainable improvements are prioritized internationally in all facets of organizations The book offers the latest developments of Circular Supply Chain Management and its applications It describes the role of human resources in regulating supply chains in the circular economy The take make waste economic model in CSCM is encouraging us to rebuild better HR and entrepreneurial policies which will be vital in building a stronger and more resilient company culture that maintains the value of all resources and is required to get through these trying times To achieve this goal currently there exists a gap between the present skill sets and the skills required in future to generate new innovation and or set a new business In turn this would request Continuous investment in employees development and training Alongside it involves a great attention on how humans are generating new innovations throughout the whole supply chain At the moment there is a focus on technologies and less consideration on humans in the field of supply chain management Again sustainability seems to be the new core of a company and its circulatory calls for a variety of human skills In this scenario the book s ultimate proposal is to give a research viewpoint that included views from policymakers regulators and practitioners The book aims to address the significance of humanizing CSCM and also invites case studies on the topic This book will meet the demands of research researchers graduate students and undergraduate students Also it will serve as reference information for academics researchers and industry professionals Economic Survey ,2016 **Women in Virology: 2022** Ana Grande-Perez,Antoinette van der Kuyl,Christine A King,2023-08-15 In celebration of International Women s Day 2022 Frontiers in Microbiology are proud to launch this Women in Virology collection a dedicated Frontiers Research Topic aimed at celebrating the achievements of women in this field There is continued gender disparity in STEM field According to UNESCO Institute for Statistics just 30% of the world s researchers are women While the number of women attending university is growing they still represent the minority of doctoral students and researchers Women remain under represented in the highest level of academia holding just 26% of full professorships As highlighted by UNESCO science and gender equality are essential to ensure sustainable development
