

The Nature of Sound Waves

Read from Lesson 1 of the Sound and Music chapter at The Physics Classroom:

<http://www.physicsclassroom.com/Class/sound/u1l1l1a.cfm>

<http://www.physicsclassroom.com/Class/sound/u1l1l1b.cfm>

<http://www.physicsclassroom.com/Class/sound/u1l1l1c.cfm>

MOP Connection: Sound and Music: sublevel 1

TRUE or FALSE: Identify the following statements as being either true (T) or false (F).

T or F?

True

1. Sound waves are longitudinal waves.

False

2. As the teacher talks, students hear the voice because particles of air move from the mouth of the teacher to the ear of the student.

True

3. Sound waves are mechanical waves.

True

4. All sound waves are produced by a vibrating object.

True

5. A sound wave does not consist of crests and troughs.

6. Mac is talking to Kate. The dot at A represents a particle of air. Describe the motion that this particle must undergo in order for Kate to hear Mac. Then show the motion by placing arrows on the diagram.

The particle of air vibrates back and forth about its fixed position. It does not translate; it vibrates. That is, the particle does not move to Kate. It simply wiggles back and forth about position A. The amplitude of its vibration is abnormally small, nowhere close in scale to that represented by the arrow on the diagram.

7. Tosh is holding one end of a slinky; the opposite end is attached to a wall. Tosh wishes to produce a longitudinal wave in the slinky. Describe how Tosh must move his hand in order to produce a longitudinal wave. Then place arrows on the diagram to show the way in which Tosh must move his hand.

In longitudinal waves (like sound waves), particles of the medium (in this case, the coils) vibrate back and forth parallel to the direction of wave motion. To cause this parallel motion, Tosh must vibrate the first rightward and leftward.

8. A sound wave is moving through air. The diagram below represents a snapshot of the air particles at a given instant in time. Several regions are labeled with a letter. Use the letters to identify the compressions and rarefactions.

Compressions: A, C, E, G, I and K

Rarefactions: B, D, F, H and J

9. A science fiction film depicts inhabitants of one spaceship (in outer space) hear the sound of a nearby spaceship as it zooms past at high speeds. Critique the physics of this film.

Sound waves are mechanical waves - they require a medium in order to move one location to another. The film disregards this property of sound waves by depicting their motion through space that is void of matter. Only electromagnetic waves could travel through the vacuum of outer space.

Nature Of Sound Waves Basic Packet Anne Surkey

Barbara Murray

Nature Of Sound Waves Basic Packet Anne Surkey:

Thank you definitely much for downloading **Nature Of Sound Waves Basic Packet Anne Surkey**. Most likely you have knowledge that, people have seen numerous periods for their favorite books past this Nature Of Sound Waves Basic Packet Anne Surkey, but end happening in harmful downloads.

Rather than enjoying a fine PDF as soon as a cup of coffee in the afternoon, instead they juggled bearing in mind some harmful virus inside their computer. **Nature Of Sound Waves Basic Packet Anne Surkey** is affable in our digital library; an online entrance to it is set as public fittingly you can download it instantly. Our digital library saves in multipart countries, allowing you to acquire the most less latency epoch to download any of our books next this one. Merely said, the Nature Of Sound Waves Basic Packet Anne Surkey is universally compatible in the manner of any devices to read.
