

Microsoft Access Test 2025/2026 Exam Questions and Corresponding Answers with Surety of 100% Pass Mark

Relational databases - **ANSWER ✓✓** A database in which data is divided into tables, which are kind of like spreadsheets. Each table has just one subject, such as customers (one table) or products (another table).

Records and fields - **ANSWER ✓✓** Storage for the discrete data in a table.

Rows (or records) store each unique data point, such as the name of a customer. Columns (or fields) isolate the information being captured about each data point into the smallest possible unit—first name might be one column and last name might be another.

Primary key - **ANSWER ✓✓** A value that ensures each record is unique.

For example, there might be two customers with the same name, Elizabeth Andersen. But one of the Elizabeth Andersen records has the number 12 as its primary key and the other has a primary key of 58.
