Varney's Midwifery Julia Phillippi, Ira Kantrowitz-Gordon, 2023-09-25 Varney's Midwifery continues to be the gold standard for midwifery practice in an updated seventh edition. New lead editors assembled a team of expert contributors and authors to continue the legacy of Varney's Midwifery as the trusted must-have resource for students, professional midwives, and women's health practitioners. Varney's Midwifery uses current evidence-based guidelines to address the care of women throughout the lifespan, including primary care, gynecology, maternity care in a variety of settings, and newborn care. The Seventh Edition reflects the new Core Competencies for Basic Midwifery Practice published in 2020, including care of transgender individuals and abortion-related care. It also provides updated information on chronic conditions in pregnancy, including a section discussing COVID-19, new techniques for fetal screening, diagnosis across the lifespan, and updated content on health equity.

Clinical Practice Guidelines for Midwifery & Women's Health Nell Tharpe, 2004. The 2004/2005 Clinical Practice Guidelines for Midwifery Women's Health approach midwifery care from a clinical perspective for the midwife who practices in any setting. The Guidelines are designed to stimulate critical thinking while providing key resources for support of midwifery care.

Skills for Midwifery Practice Australian & New Zealand Edition Sally-Ann De-Vitry Smith, Sara Bayes, 2022-02-28. This text provides clear, easy-to-read guidance on more than 110 skills for midwifery students and midwives seeking to update their practice. Underpinned with the most recent evidence-based practice and research, the second edition walks the reader through general and basic skills in a sequential and logical manner, following a woman's journey through pregnancy, labour, and birth, and postnatal care. With a focus on the performance of midwifery skills rather than on the theory of midwifery practice, *Skills for Midwifery Practice Australia and New Zealand* 2nd edition is an indispensable text to which students will return to again and again. Endorsed by the Australian College of Midwives, Step-by-step instructions for each skill, images, and diagrams aid understanding. A woman-centred approach and cultural considerations throughout. Models of midwifery care, Continuity of Care, and Lead Maternity Carer's Model. Australian NZ specific guidelines, policies, statistics, terminology, and medication administration guidelines.

2012 Accountability

Hearing with the Nursing and Midwifery Council Great Britain: Parliament: House of Commons: Health Committee, 2013-03-06. The Nursing and Midwifery Council (NMC) is a vital safeguard for care quality and patient safety, but over a number of years, the NMC has failed to understand its function and properly prioritise patient safety. The new management team in the NMC is committed to address its failings. However, there continues to be a serious gap between current performance and acceptable standards. The NMC has proposed that fitness to practise cases should be decided on average within 18 months of a complaint being received; the Committee proposes that this should be reduced to 9 months with a maximum of 12 months. The NMC also has had a poor track record of fitness to practise decisions being challenged and overturned. The CHRE has needed to almost routinely refer NMC decisions to the High Court. It is also unacceptable that

the NMC underestimated the budget for its fitness to practise directorate by 30% The Government's intervention to limit the effect of the fee increase on registrants is welcomed However nurses and midwives still face a 32% fee increase at a time of public sector pay restraint A further fee increase can not be justified and the NMC should consider introducing a phased payment system for registrants The language and communication skills of nurses and midwives remain a concern MPs also question why the NMC has made such slow progress on a system of revalidation Lastly many of the NMC's problems stem from inadequate IT infrastructure where two key systems cannot communicate directly and deliver incomplete or inaccurate information
