position as a venue for research on sensory test methods among many other topics Hundreds of articles relevant to sensory
testing have appeared in that and in other journals such as the Journal of Sensory Studies Knowledge of the intricate cellular
processes in chemoreception as well as their genetic basis has undergone nothing less than a revolution culminating in the
award of the Nobel Prize to Buck and Axel in 2004 for their discovery of the olfactory receptor gene super family Advances in
statistical methodology have accelerated as well Sensometrics meetings are now vigorous and well attended annual events
Ideas like Thurstonian modeling were not widely embraced 15 years ago but now seem to be part of the everyday thought

Humans are tough measuring instruments to work with They come with varying degrees of acumen training experiences
