Figure 2

Two particles A and B have masses $2m$ and $3m$ respectively. The particles are connected by a light inextensible string which passes over a smooth light fixed pulley. The system is held at rest with the string taut. The hanging parts of the string are vertical and A and B are above a horizontal plane, as shown in Figure 2. The system is released from rest.

- (a) Show that the tension in the string immediately after the particles are released is $\frac{12}{5}mg$. (6)

After descending 1.5 m, B strikes the plane and is immediately brought to rest. In the subsequent motion, A does not reach the pulley.

- (b) Find the distance travelled by A between the instant when B strikes the plane and the instant when the string next becomes taut. (6)

Given that $m = 0.5$ kg,

- (c) find the magnitude of the impulse on B due to the impact with the plane. (2)
