

About Scanning

Scanning Options

Scanning is easy and fun with the BC 200XLT 200-Channel Portable Scanner. You can scan in one of three ways:

- Programmable scan for known frequencies
- Search for active frequencies between two limits
- Weather frequency scan

Types of Broadcasts

You will be able to monitor broadcasts such as:

- Police and fire department (including rescue and paramedics)
- 7 pre-programmed NOAA weather frequencies
- Business/industrial radio
- Motion picture and press relay
- Utility
- Land transportation frequencies such as trucking firms, buses, taxis, tow trucks, and railroads
- Marine and amateur (ham radio) bands
- And many more ...

Before you can use the BC 200XLT, you must program a frequency into each of the channels you want to use — up to 200 channels. Programming the scanner channels is like setting the push buttons on a radio.

Before you can program these channels you must know the local frequencies you will be able to receive. You can purchase regional and local frequency directories for your area from your local Uniden Bearcat dealer, Uniden America Corporation (order form enclosed), or your local electronics store.

Unlike standard AM or FM radio stations, most services listed above do not broadcast continuously. The scanner automatically samples programmed frequencies at the rate of about 15 channels per second until it locates an active frequency. It remains on that frequency until the transmission stops for more than two seconds. The scanning cycle then resumes until another transmission is located. See page 12 for information on programming the scanner.

Where to Obtain More Information

The Bearcat Radio Club and other similar hobby clubs have publications, information on computer bulletin boards, and contests for the radio enthusiast. See the enclosed pamphlets for more information. Additional information is also available through your local library.
