

MICROSOFT® VISUAL BASIC® 2012 R E L O A D E D

Fifth Edition

DIANE ZAK

Pairing fundamental programming concepts with both business applications and fun and engaging game applications, the fully revised fifth edition of Microsoft Visual Basic 2012: RELOADED provides a solid foundation in programming principles and how to use them. The book begins by covering the basics, from creating user interfaces to understanding variables, constants, and calculations. Building on this knowledge, coverage progresses to more advanced topics, such as manipulating and querying a Microsoft Access database, creating Web applications, and creating classes and objects. This new edition leverages the powerful pedagogy of previous editions while bringing the content up-to-date with detailed explanations of the new features of Visual Basic 2012 and new examples and applications that illustrate how those features are put to work.

Features of the Text:

- Two Programming Tutorials at the end of each chapter provide step-by-step instructions for applying chapter concepts to business and game applications, engaging and motivating students.
- Review Questions, Exercises, and Class Projects are now mapped directly to each chapter's Learning Objectives in order to improve assessment of student progress.
- A Study Guide reinforces each chapter's important concepts with fun, interactive learning activities while providing students a break from reading the text.
- Full applications that include both the user interface and all code teach students coding principles in the context of the larger application.
- New videos created by the author specifically for this edition clearly and succinctly present key concepts for visual and auditory learners.

About the Author:

Prolific author and respected professional Diane Zak continues to provide an inspiring and uncomplicated learning experience for students throughout this and all of her popular programming books. Recognized for their unique, readable and friendly style, each book reflects Zak's knowledge of student needs and her extensive understanding of computer programming and its use in business today. Each book is carefully crafted with the modern student in mind. Diane Zak holds a Bachelor of Science degree in Computer Information Systems, a Bachelor of Science degree in Accounting, and a Master of Arts degree in Adult and Continuing Education. She has taught at various computer training centers and most recently served as professor at College of DuPage in Illinois.
