Harding, 2015-09-04 During a career spanning more than 50 years J H Blackburne 1841 1924 won the British Chess
Championship and several international tournaments at his peak becoming one of the world's top three chess masters A
professional player who derived his livelihood from annual tours of chess clubs in England and other countries entertaining
and teaching amateur players he astonished his contemporaries by the ease with which he played the game without sight of
the chessboard At 21 he set a world record for such exhibitions competing against 12 club players simultaneously and he
continued to perform blindfold into his sixties This first comprehensive biography of Britain's greatest chess player of the
19th and early 20th centuries presents more than 1 000 of Blackburne's games chronologically including all his surviving
games from serious competition annotated in varying detail Many are masterpieces containing beautiful combinations and
instructive endgame play Blackburne's unusual family and social background are fully explored **Gas Journal**, 1871

technical writing on corporation tax abounds but it tends to be inaccessible to public lawyers political theorists and political
economists Although recent years have seen not only an explosion in public law scholarship but also a reawakening of
interest in interpretative political theory and political economy the potential of these perspectives to illuminate the
corporation tax debate has remained unexplored In this important work John Snape seeks to reconcile these disparate
strands of scholarship and to contribute to a new way of understanding and conceptualising the reform of the law relating to
corporate taxation Drawing on important developments in public law scholarship the study combines elements of political
theory and political economy It advances a new interpretation of corporation tax law as an instrument of rule through the
maximisation of a nation's economic potential Snape shows how corporate taxation belongs at the centre of any discussion of
economic globalisation not only because of the potential of national tax systems to influence inward investment decisions but
also because of the potential of those decisions to shape the public interest that those tax systems might embody Following
public law and politics models the book looks afresh at the impact of Britain's political institutions of the processes of its
representative government and of the theory that moulds and orders the values that the corporation tax code contains This is
a timely exploration of cutting edge issues of public policy **Documents**, 1993-07 *The Social, Cultural and
