Mobile Social Networking And Computing:

Mobile Social Networking Alvin Chin, Daqing Zhang, 2013-10-30 The use of contextually aware pervasive distributed computing and sensor networks to bridge the gap between the physical and online worlds is the basis of mobile social networking This book shows how applications can be built to provide mobile social networking the research issues that need to be solved to enable this vision and how mobile social networking can be used to provide computational intelligence that will improve daily life With contributions from the fields of sociology computer science human computer interaction and design this book demonstrates how mobile social networks can be inferred from users physical interactions both with the environment and with others as well as how users behave around them and how their behavior differs on mobile vs traditional online social networks

Mobile Social Networking and Computing Yufeng Wang, Jianhua Ma, 2014-09-05 Recent advancements in mobile device technologies are revolutionizing how we socialize interact and connect By connecting the virtual community with the local environment mobile social networks MSNs create the opportunity for a multitude of new personalized services for mobile users Along with that comes the need for new paradigms mechanisms and techniques with the capacity to autonomously manage their functioning and evolution Currently most books about mobile networks focus mainly on the technical point of view Mobile Social Networking and Computing A Multidisciplinary Integrated Perspective not only addresses the theoretical aspects of MSN and computing but also introduces and categorizes existing applications It supplies a multidisciplinary perspective that considers the technology economics social sciences and psychology behind MSNs In addition to fundamental theory the book investigates the practical issues in MSN including characteristics inner structural relationship incentive mechanisms resource allocating information diffusion search ranking privacy trust and reputation Introducing recently developed technologies modes and models the book provides two distinct but related viewpoints about MSN applications socially inspired networking technology and networking technology that uses recent advancements to enhance quality of life The text illustrates the interaction between the macrolevel structure and the local rational behaviors microlevel in MSN It summarizes currently available MSN development platforms including Android and iOS and introduces and categorizes existing applications related to MSN and computing Both location based service LBS and mobile social networks in proximity MSNPs are presented in a comprehensive manner Highlighting key research opportunities this much needed reference outlines incentive mechanisms inspired by classical economics behavioral economics and social psychology and perhaps for the first time it presents a summary of the economic and business models of MSNs

Mobile Social Networking and Computing Yufeng Wang, Jianhua Ma, 2014-09-05 Recent advancements in mobile device technologies are revolutionizing how we socialize interact and connect By connecting the virtual community with the local environment mobile social networks MSNs create the opportunity for a multitude of new personalized services for mobile users Along with that comes the need for new paradigms mechanisms and techniques with the capacity to

autonomously manage their functioning and evolution. Currently most books about mobile networks focus mainly on the technical point of view. *Mobile Social Networking and Computing: A Multidisciplinary Integrated Perspective* not only addresses the theoretical aspects of MSN and computing but also introduces and categorizes existing applications. It supplies a multidisciplinary perspective that considers the technology, economics, social sciences, and psychology behind MSNs. In addition to fundamental theory, the book investigates the practical issues in MSN, including characteristics, inner structural relationship, incentive mechanisms, resource allocating, information diffusion, search, ranking, privacy, trust, and reputation. Introducing recently developed technologies, modes, and models, the book provides two distinct but related viewpoints about MSN applications: socially inspired networking technology and networking technology that uses recent advancements to enhance quality of life. The text illustrates the interaction between the macrolevel structure and the local rational behaviors at the microlevel in MSN. It summarizes currently available MSN development platforms, including Android and iOS, and introduces and categorizes existing applications related to MSN and computing. Both location-based service (LBS) and mobile social networks in proximity (MSNPs) are presented in a comprehensive manner. Highlighting key research opportunities, this much-needed reference outlines incentive mechanisms inspired by classical economics, behavioral economics, and social psychology, and perhaps for the first time, it presents a summary of the economic and business models of MSNs.

Opportunistic Mobile Social Networks Jie Wu, Yunsheng Wang, 2014-08-05. The widespread availability of mobile devices along with recent advancements in networking capabilities make opportunistic mobile social networks (MSNs) one of the most promising technologies for next-generation mobile applications. *Opportunistic Mobile Social Networks* supplies a new perspective of these networks that can help you enhance spontaneous **Social Computing: Concepts, Methodologies, Tools, and Applications** Dasgupta, Subhasish, 2009-11-30. Uncovers the growing and expanding phenomenon of human behavior, social constructs, and communication in online environments. *Integrating Psychoinformatics with Ubiquitous Social Networking* Felix Beierle, 2021-04-23. This book deepens the understanding of people through smartphone data obtained via mobile sensing and applies psychological insights for social networking applications. The author first introduces TYDR, an application for researching smartphone data and user personality. A novel structured privacy model for mobile sensing applications is developed, and the obtained empirical results help researchers gauge what data they can expect users to share in daily life studies. The new research findings, the concept of mobile sensing, and psychological insights about the formation and structure of real-life social networks are integrated into the field of social networking. Finally, for this novel integration, the author presents concepts, decentralized software architectures, and fully realized prototypes that recommend new contacts, media, and locations to individual users and groups of users.

Social Computing Subhasish Dasgupta, 2010-01-01. With an increasing accessibility to social networking tools, the development of Web 2.0 and the emergence of virtual worlds, social computing crosses cultural boundaries to join people in the digital landscape. *Social Computing: Concepts, Methodologies,*
