This guide also gives the reader a head start with eight self-contained chapters that provide comprehensive coverage of interior design for specific types of commercial facilities ranging from offices to food and beverage facilities and from retail stores to health care facilities. Each chapter is complete with a historical overview, types of facilities, planning and interior design elements, design applications, a summary, references and Web sites. New design applications covered include spas in hotels, bed and breakfast inns, coffee shops, gift stores and salons, courthouses and courtrooms and golf clubhouses. In keeping with the times, there are new chapters focusing on senior living facilities and on restoration and adaptive use. A chapter on project management has been revised and includes everything from proposals and contracts to scheduling and documentation. Throughout the book, design application discussions, illustrations and photographs help both professionals and students solve problems and envision and implement distinctive designs for commercial interiors. With information on licensing codes and regulations along with more than 150 photographs and illustrations, this combined resource and instant reference is a must have for commercial interior design professionals, students and those studying for the NCIDQ licensing exam.
