PLANNED OBSOLESCENCE – A BLESSING OR A CURSE?

When my water boiler failed after twenty years of faithful service, I wasn't all that upset to have it replaced with a new one. But when the installer told me, after having finished the job, 'Well, that should last you five years or so,' I stared back at him in disbelief. After taking a moment to compose myself, I asked, 'Does that mean it isn't a good quality heater?' He shrugged. 'Not at all. It's just the way they make them nowadays. It's all about planned obsolescence, you know.'

So-called 'planned obsolescence', which is the euphemism used to describe the way a product lasts for only a limited period of time, can be traced back to the USA in the 1920s. At that time, car manufacturers came up with the idea of changing their car designs annually in order to convince customers that they needed to replace their vehicles regularly. While this was really a case of style-based obsolescence, the idea was soon taken up by makers of other products, and was expanded to include their actual functional elements.
