INFORMATION SHEET 46

Liquidation: a guide for employees

If a company is in financial difficulty, its shareholders, creditors or the court can put the company into liquidation.

This information sheet provides general information for employees of companies in liquidation. Employees should also read ASIC information sheet INFO 45 *Liquidation: a guide for creditors*.

Who is an employee?

You are likely to be classified as an employee if you are:

- engaged by a company under an award, Certified Agreement, Australian Workplace Agreement, or a contract of employment, and
- paid a salary, wages or commission.

Contractors are not employees. They are ordinary unsecured creditors of the company.

If you are an employee who is owed money for unpaid wages, superannuation, annual leave, sick leave, long service leave, retrenchment pay or other benefits, you are a creditor of the company. You may be entitled to some or all of what you are owed in priority to the company's other creditors.

The purpose of liquidation

The purpose of liquidation of an insolvent company is to have an independent and suitably qualified person (the liquidator) take control of the company so that its affairs can be wound up in an orderly and fair way for the benefit of creditors.

There are two types of insolvent liquidation:

- creditors' voluntary liquidation, and
- court liquidation.

The most common type is a creditors' voluntary liquidation, which usually begins in one of two ways:

- creditors vote for liquidation following a voluntary administration or a terminated deed of company arrangement, or
- an insolvent company's shareholders resolve to liquidate the company and appoint a liquidator. Within 11 days of being appointed by shareholders, the liquidator must call a meeting of creditors who may confirm the liquidator's appointment or appoint another liquidator of the creditors' choice.

Rescue of Business in Europe Gert-Jan Boon, 2020-01-30 This edited volume is based on the European Law Institute's ELI project Rescue of Business in Insolvency Law. The project ran from 2013 to 2017 under the auspices of the ELI and was conducted by Bob Wessels and Stephan Madaus who were assisted by Gert-Jan Boon. The study sought to design elements of a legal framework that will enable the further development of coherent and functional rules for business rescue in Europe. This includes certain statutory procedures that could better enable parties to negotiate solutions where a business becomes financially distressed. Such a framework also includes rules to determine in which procedures and under which conditions an enforceable solution can be imposed upon creditors and other stakeholders despite their lack of consent. The project had a broad scope and extended to consider frameworks that can be used by non-financial businesses out of court and in a pre-insolvency context. Part I of this book, the ELI Instrument as approved by the ELI Council and General Assembly, features 115 recommendations on a wide variety of themes affected by the rescue of financially distressed businesses, such as the legal rules for professions and courts, treatment and ranking of creditors' claims, contract, corporate and labour law, as well as laws relating to transaction avoidance. Part II consists of national reports that sketch the legal landscape in 13 States and of an Inventory Report on International Recommendations from Standard Setting Organisations, both of which provided insight for the drafting of the Instrument. This volume is designed to assist those involved in a process of law reform and those setting standards for soft law in the business rescue context.

Farmers' Guide, 1897 VAT Neutrality Charlène Adline Herbain, 2015-05-04 Most major economies use a value added tax (VAT) which is a derivation of the French 1954 *taxe sur la valeur ajoutée*. The initial imposition of VAT in France and its spread around the world have been driven by economic reasons. This book focuses on one of these economic triggers: the neutrality of VAT as regards the functioning of the economy. It demonstrates that the reason VAT was chosen in France and why thereafter it spread around the world was because it offered the possibility to collect governmental revenue while allowing the economic forces of the market to interplay without being adversely affected. The prerequisite conditions for the existence of VAT neutrality are therefore identified herein along with an overview of the VAT mechanism demonstrating that the concept of neutrality is built into the VAT system in a manner that allows for the

preservation of the natural functioning of the market After the definition of VAT neutrality is set forth the elements that comprise VAT neutrality are tested against the realities on the ground and the issues that infringe the neutrality of VAT are identified and analysed In conclusion remedies for these issues are being sought by a review of the causes of infringement of VAT neutrality in the perspective of selected proposals for modified VAT systems These proposals include redesignating the place where VAT is levied and improving VAT collection Ultimately the proposed solution has recourse to the roots of VAT together with the most advanced technological tools available to give back to VAT the power to levy revenue while letting the economic forces of the market interplay without instigating any adverse influence Real Estate Record and Builders' Guide ,1914 *Country Guide and Nor'west Farmer* ,1926 **Indiana Farmer's Guide** ,1921 Official Gazette Vietnam,2015-03 United States Code Annotated United States,2005 **The Publishers' Circular and Booksellers' Record** ,1916 **United States Code Service, Lawyers Edition** United States,1936 **Opinions of the Attorney General of the State of Wisconsin** Wisconsin.
