Changing the Course of Failure Sandra Stotsky, 2018-05-18 The basic purpose of this book is to help policy makers at all levels of government understand that 1 widespread adolescent underachievement is not susceptible to solution by educational interventions no matter how much money is allocated to public education and 2 there are unidentified educational and civic costs to focusing on low achievement and to expecting public institutions of education for K 12 and college to solve a growing social problem Many policy makers seem to think that teachers schools are the primary cause of low achievement Educational institutions still cannot solve a non education caused problem and haven't done so for over fifty years despite all the public and private money that has been allocated The book concludes with suggested policies for addressing the damage to public education from gap closing standards and with suggested areas for policy making in order to change the current course of failure for many low achieving students

Banking on Equality Supriti Bezbaruah, 2015-03-24. It may well be surprising to say that the world should look to India as a model of gender equality. India's banking sector proves the exception with several women reaching the highest positions in India's top banks including the country's largest bank. Based on interviews and surveys of bank employees in India's National Capital Region, this book looks at what lies behind the media rhetoric and provides a systematic analysis of patterns of and responses to gender inequality in the banking sector in India. The book uncovers how gender discrimination still persists in the banking sector albeit in covert forms. Through a comparison of nationalized Indian, private, and foreign banks, the book demonstrates how the impact of laws, local cultural norms, and gendered workplace practices are mediated through different organizational forms in these different types of banks to create varied experiences of gender inequality. The book is one of the first books to provide a thorough in-depth analysis of women's employment in the Indian banking sector, currently an under-researched area.
