Department of Agriculture ,Forest Service Technology and Development Program, Many readers undoubtedly have run
crosscut saws in the past and a lot of you know the difference between a good running saw and a poorly filed one A poorly
filed saw deserves the name I have often heard attributed to it misery whip A well filed saw however is efficient and can be
satisfying to use Only in recent years was a chain saw developed that could beat a topnotch buckler in a contest There is a
record of a 32 inch Douglas fir log cut in 1 minute 26 5 seconds by one buckler Saw filers of any quality are becoming very
difficult if not impossible to find This manual was written so those of you who use crosscut saws can maintain them
yourselves and overcome some of the misery of that ol whip The manual provides a basic description of how and why a
crosscut saw works tips on building a saw vise and some experience tested methods as a guide for achieving a well running
saw Only saws having raker teeth are discussed because they are by far the most common saws found today This includes
lance perforated lance and champion tooth patterns *Frame Saw Manual* ,1982-01-01 The Acme Saw Shop Manual
