GEMC-WL-SMK SUPERVISED WIRELESS DIGITAL SMOKE DETECTOR INSTALLATION INSTRUCTIONS

WI1726A.03 01/10

The GEMC-WL-SMK is a high-quality photoelectric smoke detector with built-in supervised digitally-coded radio transmitter. It is compatible with Napco's GEM-RECV and GEMC-RECV Series supervised receivers that monitor alarms, restores, low battery, tamper and status.

During normal operation, when unit is in standby mode and is within proper sensitivity limits, the green LED on the GEMC-WL-SMK flashes once every 10 seconds. As soon as smoke is detected, the GEMC-WL-SMK sounds a local

alarm and the transmitter sends an alarm signal to the supervised receiver (Operating Frequency: 319.5Mhz). The alarm signal is repeated every 10 seconds thereafter as long as smoke is still present. A restore report is sent when the smoke detection chamber clears. Supervisory status reports are sent from the GEMC-WL-SMK every hour.

Note: Coding switches are not required or used in the GEMC-WL-SMK; each transmitter is assigned a unique identification code number at the factory.

- 1 Remove the mounting plate.** Remove the GEMC-WL-SMK mounting plate by turning the plate counter-clockwise and pulling it up.

IS CORRECTLY
MOUNTED

- 3 Install battery.** Place one 3-volt lithium Duracell DL123A, Varta CR123A, Panasonic CR123A or Sanyo CR123A in its battery compartment, observing correct polarity. Install battery and enroll the GEMC-WL-SMK into the control panel before mounting. During power up and status initialization, both the green and red LED's blink four times in unison. Then press the **TEST** button once to complete installation.

3-VOLT BATTERY
LOCATION

Low Battery Warning

The smoke detector and transmitter are powered by one 3-volt lithium battery (supplied) that can power the unit for at least one year. If battery voltage drops below normal, a low battery report is sent to the panel for a period of 48 hours; if the voltage is still below normal after this time, the detector sounder will chirp and its red LED will flash every 45 seconds. **Note:** Unit shuts down after 7 days. A low-battery report is sent to the receiver with any status or alarm transmission. If a low-battery condition is indicated, always replace battery.

NOTE: Temperature and humidity extremes may reduce the life of the battery. In addition, the GEMC-WL-SMK detector is designed to prevent re-mounting to the mounting plate without the battery installed.

Use Only Battery Specified In Marking. Use of A Different Battery May Have A Detrimental Effect On Detector Operation.
