Brown Center on Education Policy,1995-08 What is the outlook for educational reform in the United States One of the most striking proposals has been to establish a system of national standards which has raised many complex questions Is it possible for the United States with its history of extreme decentralization to establish and enforce national standards for what students should know Who will create these standards What would be the role of the federal state and local governments While the idea of national standards has been widely supported many respected educators doubt their value from fear that such standards will institutionalize the lowest common denominator Others cite the poor performance of U S students on international tests and insist that the U S will suffer because of this poor performance The debate becomes even more intense when the question of assessment is posed Is it possible to develop a national examination system tied to new standards Should such tests be used to influence entry to colleges and jobs Would the motivation of students to learn be increased if they knew that their performance would be reviewed by colleges and employers Is it fair to set standards for students without setting standards for schools To address these and other questions this book the result of a Brookings conference brings together representatives of various viewpoints on the utility and equity of increasing the use of tests for students teachers and schools The contributors are Chester Finn Jr the Edison Project Daniel Koretz RAND Andrew Porter Wisconsin Center for Education Research Lauren Resnick University of Pittsburgh Roy Romer Governor of Colorado Albert Shanker American Federation of Teachers Theodore RSizer Brown University Marshall C Smith U S Department of Education and Donald M Stewart The College Board Brookings Dialogues on Public Policy *Measuring Up Grade 4 Science* Peoples Education Staff,2008-08-05 **Harcourt Science: Physical science, [grade] 4, Units E and F, teacher's ed.
