Web-Based Control and Robotics Education Spyros G. Tzafestas, 2009-07-31 For the things we have to learn before we can do them we learn by doing them Aristotle Teaching should be such that what is offered is perceived as a valuable gift and not as a hard duty Albert Einstein The second most important job in the world second only to being a good parent is being a good teacher S G Ellis The fast technological changes and the resulting shifts of market conditions require the development and use of educational methodologies and opportunities with moderate economic demands Currently there is an increasing number of educational institutes that respond to this challenge through the creation and adoption of distance education programs in which the teachers and students are separated by physical distance It has been verified in many cases that with the proper methods and tools teaching and learning at a distance can be as effective as traditional face to face instruction Today distance education is primarily performed through the Internet which is the biggest and most powerful computer network of the World and the World Wide Web WWW which is an effective front end to the Internet and allows the Internet users to uniformly access a large repertory of resources text data images sound video etc available on the Internet

Vehicle Power Management Xi Zhang, Chris Mi, 2011-08-12 Vehicle Power Management addresses the challenge of improving vehicle fuel economy and reducing emissions without sacrificing vehicle performance reliability and durability It opens with the definition objectives and current research issues of vehicle power management before moving on to a detailed introduction to the modeling of vehicle devices and components involved in the vehicle power management system which has been proven to be the most cost effective and efficient method for initial phase vehicle research and design Specific vehicle power management algorithms and strategies including the analytical approach optimal control intelligent system approaches and wavelet technology are derived and analyzed for realistic applications Vehicle Power Management also gives a detailed description of several key technologies in the design phases of hybrid electric vehicles containing battery management systems component optimization hardware in the loop and software in the loop Vehicle Power Management provides graduate and upper level undergraduate students engineers and

researchers in both academia and the automotive industry with a clear understanding of the concepts methodologies and prospects of vehicle power management
