Organizational Memory OM which characterizes any organization's ability to perform is the single biggest influence on decision making excellence. It is a factor of production that has already been paid for at great expense yet is readily discarded in the backwash of the biggest change in workplace practice for more than a century: the actively encouraged flexible labour market. Corporate DNA explains why this key component of intellectual capital should be better managed, can be better managed, and particularly how it can be used to help organizations reduce the pandemic of repeated mistakes.
