The LabVIEW Student Edition Lisa K. Wells, 1995 This text should make it easy to build custom systems for data acquisition instruments control data analysis and data presentation It offers a programming methodology in which users graphically assemble software modules called Virtual Instruments VIs LabVIEW can be used in a variety of industries and applications including simulating heart functions controlling an ice cream making process detecting hydrogen gas leaks on the space shuttle modelling power systems to analyze power quality and testing electronic circuit boards in computer and electronic devices

Learning with LabVIEW 6i Robert H. Bishop, 2001 Defined as The science about the development of an embryo from the fertilization of the ovum to the fetus stage embryology has been a mainstay at universities throughout the world for many years Throughout the last century embryology became overshadowed by experimental based genetics and cell biology transforming the field into developmental biology which replaced embryology in Biology departments in many universities Major contributions in this young century in the fields of molecular biology biochemistry and genomics were integrated with both embryology and developmental biology to provide an understanding of the molecular portrait of a development cell That new integrated approach is known as stem cell biology it is an understanding of the embryology and development together at the molecular level using engineering imaging and cell culture principles and it is at the heart of this seminal book Stem Cells and Regenerative Medicine From Molecular Embryology to Tissue Engineering is completely devoted to the basic developmental cellular and molecular biological aspects of stem cells as well as their clinical applications in tissue engineering and regenerative medicine It focuses on the basic biology of embryonic and cancer cells plus their key involvement in self renewal muscle repair epigenetic processes and therapeutic applications In addition it covers other key relevant topics such as nuclear reprogramming induced pluripotency and stem cell culture techniques using novel biomaterials A thorough introduction to stem cell biology this reference is aimed at graduate students post docs and professors as well as executives and scientists in biotech and pharmaceutical companies

Learning with LabVIEW 2009 Robert H. Bishop, 2010 Learning With LabVIEW 2009 introduces students to the basics of LabVIEW programming and relates those concepts to real applications in academia and industry With LabVIEW students can design graphical programming solutions to their homework problems and laboratory experiments

Learning with LabVIEW 8 Robert H. Bishop, 2007 The defacto industry standard for test measurement and automation software solutions LabVIEW 8 delivers the graphical programming capabilities that allow users to design programmable software solutions to problems and lab experiments This version includes new chapter covering LabVIEW MathScript and an upgrade to Chapter 11 Analysis to reflect 150 new and enhanced analysis VIs A new Appendix has been added to include exciting innovative developments with Sound Card API LabVIEW Project and Shared Variables For electrical engineers and those involved in measurement and instrumentation
