

ECONOMICAL SINGLE CHANNEL DROP-OFFS

Looking for the most reliable, low-cost way of providing communications to remote pumping or producing stations? With the Lenkurt 34A stackable radio carrier system you can drop off single channels for voice, telemetering and supervisory control at only a fraction of the usual "large system" cost. ■ Such economy is possible because channels comprising the basic eight channel group are independent of each other and can be added one-by-one, without common equipment. Adding only group mod-

ulation equipment, you can continue to expand the system up to 24 channels. ■ Other features that make the 34A highly practical for pipeline communications include full synchronization to insure that crucial commands to open and close valves are received as sent, solid-state design for low power drain, and three power options (24 or 48 volt d.c.; 115 volt a.c.). ■ If your company depends on you for the selection of carrier equipment, be sure to get complete literature on the 34A from your Lenkurt representative.
